## TECHNICAL PROJECT MANAGEMENT

A highly skilled Software Project Manager with over 2 years of experience in developing and managing software projects. Expertise in sprint planning, defining roadmaps, and implementing DevOps practices to drive project efficiency and achieve business goals. Proven track record of delivering projects on time, fostering collaborative environments, and enhancing team productivity.

## KEY COMPETENCE

- **Programming Languages:** HTML, CSS, Javascript, Typescript, React.js, Next.js
- **Project Management Tools:** Jira, Lark, Google meet, Microsoft Teams
- **Soft Skills:** Team Management, Stakeholder communication, Risk Management, waterfall/Agile methodologies.
- **Scrum Master:** Sprint Planning, User stories, product roadmap, sprint retrospective
- Software Development Lifecycle

## PROFESSIONAL EXPERIENCE

### Technical Project Manager | Semicolon Africa (Project Lab)

- Oversee multiple software development projects, managing a team of developers.
- Collaborate with stakeholders, including product owners and clients, to gather requirements, provide updates, and ensure alignment with business objectives.
- Define and maintain product roadmaps, prioritizing features and enhancements.
- Utilize project management tools such as JIRA, to monitor progress and communicate project status
- Led sprint planning, daily stand-ups, sprint reviews, and retrospectives to ensure continuous improvement and timely delivery.
- Work alongside the QA team to perform regression and functional testing, ensuring quality before transitioning applications to production.
- facilitate sprint planning sessions to ensure efficient workflow and adherence to product milestones.

#### DevOps Responsibilities:

- Onboarded into DevOps, responsible for checking logs and reporting issues to developers.
- Collaborated with a DevOps Team to integrate SonarCloud into Bitbucket, enabling automated code quality checks
- Collaborate with DevOps and engineering teams to ensure smooth deployment processes and resolve any environment-related issues.

### Crown Interactive

June 2023- January 2024

#### Software Engineer-Frontend - Remote

I was responsible for writing clean, maintainable code and providing proper documentation. This ensures that the codebase is understandable and can be easily maintained by other team members.

- Built Logistics Partner Portal application that serves thousands of B2B and B2C users across different regions in Africa.
- Responsible for building the user interface and developing frontend architecture on the Logistics Partner Portal Cicod product using several technologies and methodologies.
- Collaborated closely with the product team to iterate on design concepts, translating them into functional and engaging web applications.

## PROJECT ACHIEVEMENTS

- **Enum ATS Rollout:** Spearheaded the deployment of an advanced Applicant Tracking System with features that simplifies and accelerates candidate screening through predefined criteria. Key improvements include shortlisting candidates directly from their profiles, creating and managing talent pools for future recruitment, customizing assessments to enhance the shortlisting process, and filtering candidates by details like age or location for refined evaluations.
  - **Karrabo Application:** Spearheaded the development and deployment of karrabo project which address inefficiencies in payment collection, processing, and reconciliation. The integration of features such as identity management, smart wallet functionality, terminal management, and robust APIs, enabling seamless interoperability with financial service providers, ensuring 99.9% uptime, and delivering a user-friendly experience for merchants, agents, and end-users, while extending financial inclusion to underserved regions.
-
